B.Tech, Computer Science and Engineering - Artificial Intelligence and Machine Learning

Address : 79D Valliyappa Garden,Gandhi Nagar,Palani,Dindigul,INDIA

## Education

### SRM IST-Kattankulathur

B.Tech · Computer Science and Engineering - Artificial Intelligence and Machine Learning

2026

CGPA - 7.75/10

### Devi Matriculation Higher Secondary School

Class XII - TamilNadu State Board · Bipc · Palani

2022

Percentage - 89%

### Devi Matriculation Higher Secondary School

Class X - TamilNadu State Board · Bipc · Palani

2020

Percentage - 91.6%

## Projects

### AI ChatBot | [Link](#)

Mini Project · Python

Jan 2025 - May 2025

SEPM

- Developed an AI chatbot capable of simulating human-like conversations using artificial intelligence.
- Applied natural language processing and machine learning techniques to understand user queries and generate relevant responses.
- Designed the chatbot for versatile use cases including customer support, virtual assistance, education, and healthcare.

### Fake News Detection | [Link](#)

Mini Project · Python

Jan 2025 - May 2025

Accelerated Data Science

- Developed a fake news detection web application using FastAPI, React, and Google's Gemini AI.
- Implemented support for image, PDF, and URL inputs with file validation and preview functionality.
- Integrated multilingual OCR using OCR.space for accurate text extraction from documents.
- Enabled AI-driven verification by cross-referencing multiple sources and generating detailed reports.
- Designed a responsive dark-themed UI with real-time feedback and robust error handling.

### Ovarian Cancer Subtype Classification using Histopathological Images

Minor Project · Python

Jan 2025 - May 2025

Deep Learning

- Developed a deep learning model to predict ovarian cancer subtypes from histopathological images.
- Integrated pre-trained CNN architectures such as MobileNet with an attention mechanism to highlight relevant image regions.
- Improved classification performance, particularly for underrepresented cancer subtypes.
- Applied Grad-CAM visualizations to enhance model interpretability and support clinical decision-making.

### EDUBOT | [Link](#)

Mini Project · Python

Jul 2025 - Dec 2025

Deep Learning

- Built **EDUBOT**, an AI-powered virtual learning assistant delivering context-aware academic explanations.
- Implemented multi-turn conversational AI to support follow-up questions and adaptive learning.
- Designed a user-friendly chat interface with fast, reliable AI response handling.
- Tested and optimized the system to ensure accuracy, low latency, and consistent performance

### Alzheimer's Disease Diagnosis using DP-CCNN

University Research Project · Python, TensorFlow, Keras, NumPy, Pandas, OpenCV

Jan 2026 - Present

Deep Learning

- Developed a Deep Parametric Continuous Convolutional Neural Network (DP-CCNN) for Alzheimer's disease detection using MRI images.
- Uses continuous convolution to capture irregular brain structure changes.
- Includes preprocessing, feature extraction, and deep learning classification pipeline.
- Achieved high classification accuracy (~99%) with strong model performance.
- Contributes to early diagnosis of Alzheimer's disease and AI-based healthcare solutions (SDG 3).

## Certifications

|                                                                                               |                     |
|-----------------------------------------------------------------------------------------------|---------------------|
| <b>Cisco Networking Badge</b>   <a href="#">Link</a><br>Cisco                                 | Nov 2024            |
| <b>Business Analysis &amp; Process Management</b><br>Coursera                                 | Feb 2025            |
| <b>Machine Learning Onramp</b>   <a href="#">Link</a><br>Matlab Academy                       | Jan 2025            |

| <b>Fortinet Operator Self Paced</b>   <a href="#">Link</a><br>Fortinet                        | Jun 2025            |

## Volunteering

|                                                                                                                                                                                                                |                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Panchayat Union Middle School</b><br>Volunteer · Quality Education                                                                                                                                          | Jun 2024 - Jul 2024 |
| Worked for one month as a teaching volunteer under the Quality Education (UN SDG 4) initiative. Assisted students in learning core subjects, supported classroom activities, and promoted inclusive education. |                     |

## Skills

**Programming Languages:** C, Python, C++, SQL, Java

## Languages

English [Professional Working Proficiency], Tamil [Native Proficiency]
